

The meter box and assembly for Industrial, Commercial and Domestic loads requiring capacities between 6 and 16 standard cubic metres of Natural Gas at medium pressure supply (2bar system). Derivatives are also available for Low Pressure Natural Gas and Liquid Petroleum Gases. Kindly consult the Manufacturer for details of these options.

The aesthetic and cost effective solution for larger domestic and smaller Industrial.Commercial loads. Ready assembled and tested requiring only box positioning and connection of the inlet and outlet pipework at site. Note that the Unibox may also be wall mounted as an installation alternative .

Pressure losses are kept to a minimum following attention to detail in the selection of material.

Manufactured by Fiorentini UK Ltd, a proven product manufacturer, supplier and station builder to Transco and the PGTs for many years. Outside their own supply Fiorentini utilize only proven and reliable materials known and trusted within the "Gas Industry"

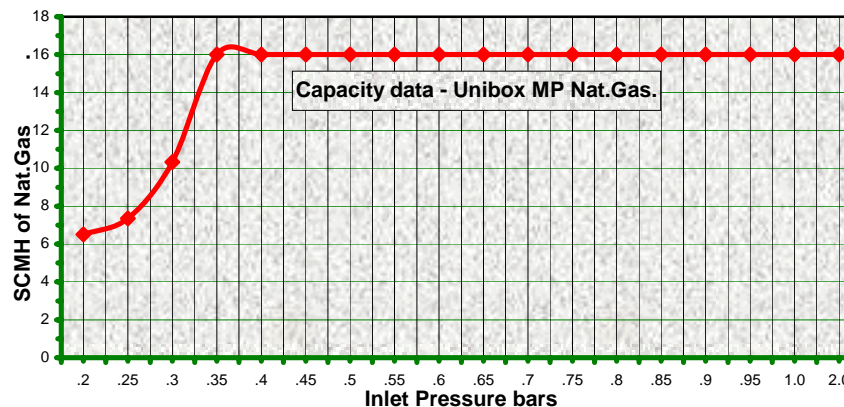

Unibox.....leader in its class, clean lines with rugged construction and composition materials.

List of Primary Components

1.	Wask 25mm x 3/4" Transitional fitting
2.	Hepworth Unibox
3.	Fire safe 3/4" full bore ball valve - lever operated
4.	Flexible connection
5.	Fiorentini MP regulator incl. slamshut /relief valve
6.	Meter isolation vlave 1"
7.	GF inlet 1 1/4"
9.	1 1/4" BS 746 nut/liner
10.	Diaphragm meter G10/U16 Elster Krom Schroder
11.	1 1/4" BS 746 nut/liner
12.	GF outlet 1 1/4"
13.	1 1/4" cut spool
14.	GF 1 1/4" barrel union
15.	GF/Crane 1 1/4" cap

Weights & Dimensions excluding union

Height 500mm
 Width 485mm
 Depth 290mm
 Weight 15kg
